Revision History

Name	Date	Reason for Changes	Version
Development Team	March 14, 2026	Initial Draft	1.0

1 Introduction

1.1 Purpose

This document describes the Software Requirements Specification (SRS) for the mobile application **JKKNIU Diary**. The application will provide centralized information services for students, faculty, staff, and visitors of Jatiya Kabi Kazi Nazrul Islam University.

The system will also include an administrative interface within the mobile application for managing dynamic content such as notices, teacher profiles, and bus schedules.

1.2 Document Conventions

The following conventions are used in this document:

- Functional requirements are labeled as REQ-x
- Requirements are grouped by system features
- Priority levels: High, Medium, Low

1.3 Intended Audience and Reading Suggestions

This document is intended for:

- Software Developers
- Project Managers
- System Architects
- Quality Assurance Engineers
- University Stakeholders

Readers should first review the Introduction and Overall Description sections before reading detailed system features.

1.4 Project Scope

JKKNIU Diary will serve as a mobile information platform for university-related services.

The application will enable users to:

- Access university information
- View official notices
- Search faculty members
- Check bus schedules
- Receive important notifications

Administrators will manage content directly from the mobile application through an admin dashboard.

1.5 References

- University official website
- REST API development standards
- Mobile UI design guidelines

2 Overall Description

2.1 Product Perspective

JKKNIU Diary is a new mobile-based system designed to digitize university information services.

System Architecture:

Mobile App → Backend API → Database

The admin dashboard will be accessible through the mobile application using secure authentication.

2.2 Product Features

Major features include:

- Home dashboard
- Notice board
- Faculty directory
- Bus schedule
- About university
- Search functionality
- Push notifications
- Admin dashboard

2.3 User Classes and Characteristics

Public Users

- Students
- Teachers
- Visitors

These users can view information but cannot modify content.

Admin Users

- University staff
- Content managers

Admins can manage notices, faculty data, and schedules.

2.4 Operating Environment

- Android mobile devices
- iOS mobile devices
- Backend server with REST API

2.5 Design and Implementation Constraints

- Mobile-first architecture
- Internet connectivity required
- Secure authentication system
- API-based communication

2.6 User Documentation

The following documentation will be provided:

- Mobile application user guide
- Admin usage documentation
- Technical API documentation

2.7 Assumptions and Dependencies

- Administrators will regularly update content
- Backend services will remain available
- Users will have internet access

3 System Features

3.1 Home Module

3.1.1 Description and Priority

Displays the main dashboard including latest notices.

Priority: High

3.1.2 Functional Requirements

- REQ-1: The system shall display latest notices.
- REQ-2: The system shall provide navigation to main modules.

3.2 Notice Management

3.2.1 Description and Priority

Provides university notice distribution.

Priority: High

3.2.2 Functional Requirements

- REQ-3: The system shall display notices.
- REQ-4: Users shall view notice details.
- REQ-5: Notices may include PDF attachments.
- REQ-6: Admin shall create notices.
- REQ-7: Admin shall edit notices.
- REQ-8: Admin shall delete notices.

3.3 Faculty Directory

3.3.1 Description and Priority

Displays teacher profiles.

Priority: High

3.3.2 Functional Requirements

- REQ-9: The system shall display faculty list.
- REQ-10: Users shall search teachers by name.
- REQ-11: The system shall display teacher profiles.

3.4 Bus Schedule Module

3.4.1 Functional Requirements

- REQ-12: The system shall display bus routes.
- REQ-13: The system shall display bus schedules.
- REQ-14: Admin shall update schedules.

3.5 About University

3.5.1 Functional Requirements

- REQ-15: The system shall display university information.
- REQ-16: The system shall display historical information about the university.

3.6 Notification System

3.6.1 Functional Requirements

- REQ-17: The system shall send push notifications for new notices.
- REQ-18: Admin shall send manual notifications.

3.7 Admin Authentication

3.7.1 Functional Requirements

- REQ-19: The system shall allow admin login.
- REQ-20: Unauthorized users shall not access admin features.

4 External Interface Requirements

4.1 User Interfaces

The application shall provide:

- Mobile dashboard
- Notice list page
- Faculty directory
- Bus schedule page
- Admin dashboard

4.2 Hardware Interfaces

Supported devices:

- Android smartphones
- iOS smartphones

4.3 Software Interfaces

- Backend REST API
- Database server
- Push notification service

4.4 Communications Interfaces

- HTTPS protocol
- JSON data exchange

5 Other Nonfunctional Requirements

5.1 Performance Requirements

- Pages should load within 2 seconds.
- The system should support thousands of users.

5.2 Safety Requirements

The system shall prevent accidental deletion of important information.

5.3 Security Requirements

- Secure admin authentication
- Encrypted API communication

5.4 Software Quality Attributes

- Reliability
- Usability
- Maintainability
- Scalability

6 Other Requirements

Future features may include:

- Student login portal
- Event management
- Research publications
- Gallery

A Glossary

- SRS: Software Requirements Specification
- MVP: Minimum Viable Product
- Admin: Authorized system manager

B Analysis Models

Future documentation may include:

- ER diagrams
- System architecture diagrams
- Application flow charts

C Issues List

Pending decisions:

- Final technology stack
- Hosting environment
- Notification service configuration
